- Product weight (65401): 10 lbs.

The Portable Skylight Netting System by Tie Down Safety offers skylight fall protection with a simple way to temporarily work around skylights. This skylight net prevents workers from falling into a skylight with the bright colors. When installed, this product also provides an anchorage point. The Portable Skylight Netting System does not provide a permanent solution but a temporary fall protection solution in accordance with OSHA regulations. The Portable Skylight Netting System offers a multi-functional and durable piece of skylight fall protection equipment. Tie Down Safety maintains high standards and quality control through quality raw materials and components made in the USA.
